

**Take a walk
on the sublimation
wild side.**

**Get Creative.
Get Personal.
Get Going in the Right Direction.
Get the Message.**

Wherever you need to go, TEC Tile will take you there.

Striking and durable, TEC Tiles are the latest creative sublimation solution for graphic flooring. The only non-rigid floor tile suitable for digital printing on the market, TEC Tile is a completely new way to look at promotional flooring systems. Combined with the incredible graphic output of sublimation technology, TEC Tiles create a vibrant option for advertising, branding, or just creative production.

Utilizing Thermal Encapsulated Color technology, TEC Tile provides color vibrancy that lasts. As easy as it is on the feet (compared to other flooring surfaces), TEC Tile is equally easy on the environment. TEC Tiles are PVC-free and require no additional processes, laminates or solvents associated with traditional printing.

Suitable for light traffic situations, TEC Tile is a great fit for innovative flooring systems. Additionally, TEC Tile can be cut to any shape with a standard contour cutter, expanding the gamut of applications for use.

Directional, promotional, personal. Whatever your needs are, TEC Tile is an inventive, new way to get your message across. Get TEC Tile today.

Advantages of TEC Tile:

- Easy to Create and Apply
- Customizable
- Vibrant Colors
